- Closing + Q&A

Introduction and Problem Statement

<<The Human & Economic Toll of Digital Disinformation>>

What problem are we solving?

- Misinformation spreads fast, costing lives and money.
- Next-gen AI threats (deepfakes, voice cloning) industrialize digital fraud.

Who Faces This Problem?

- Citizens & Voters
- Investors & Markets
- Everyday Users

Why is it important? (The Reality)

- **Massive Financial Drain**: **2024** stock market rumors wiped out **₹10,000 Crore.**
- **Tragic Loss of Life**: Disinformation-fueled riots and health panics caused hundreds of deaths.
- **The AI Escalation**: AI scam losses surged from **₹5 Crore (2023) to ₹70 Crore (2025)**

Misinformation Impact in India

Year	Incident	Type	Direct Loss (₹ Crore)	Indirect Loss (₹ Crore)	How Cost Occurs	Direct Deaths	Indirect Deaths (Suicides/Panic)	Severity	Sources
2017–18	WhatsApp rumors	Misinformation	0.2	50	Mob violence, policing	30	5	High	Govt + media reports
2013	Muzaffarnagar riots	Disinformation	100	500	Riots, displacement	60	20	Severe	Court + reports
2020	Delhi riots	Mixed	250	1000	Infrastructure loss	53	15	Severe	Police + reports
2020–21	COVID misinformation	Misinformation	500	2000	Healthcare strain	-	100	Extreme	WHO + Govt
2021	Toolkit case	Disinformation	10	100	Admin + narrative	-	0	Medium	Media
2023	Deepfakes	AI Disinformation	5	200	Fraud, trust loss	-	10	High	Cyber reports
2024	Operation Sindoor	Disinformation	2	50	Panic response	-	2	Medium	Govt debunk
2024	Stock rumors	Misinformation	150	10000	Market panic	-	25	Extreme	Market analysis
2025	AI voice scam	Disinformation	20	300	Fraud	-	5	High	Cybercrime reports
2025	Election deepfakes	Disinformation	50	500	Political disruption	-	10	Extreme	Election monitoring

Our Solution – Satya Ai

<<A real-time, multilingual Digital Trust Hub>>

How We Solve It (The 3-Pillars)

- **Text/URLs**: Multilingual fake news analyzer (100+ languages).
- **Media**: Deepfake & synthesized image scanner.
- **Apps**: Fraudulent APK & app store scanner.

The Key Differentiator

No "black box" guessing. We provide a plain-English "Executive Summary" explaining why content is fake, backed by live journalistic cross-referencing.

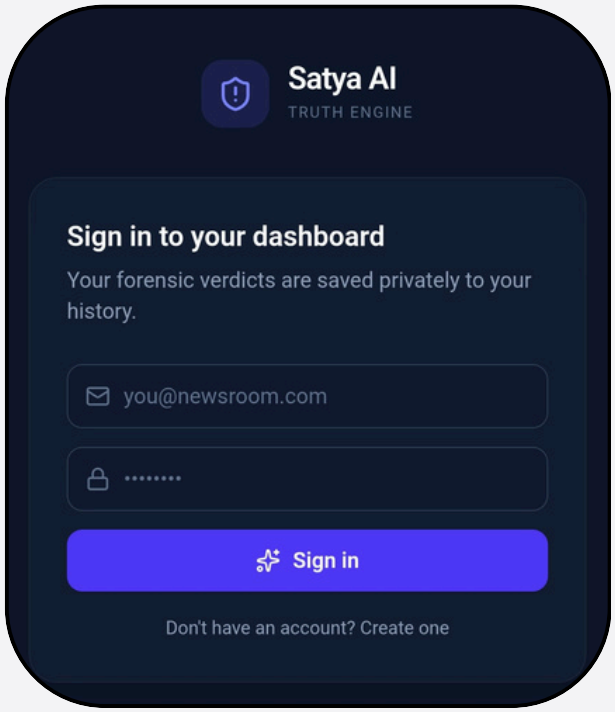
What Makes It Different?

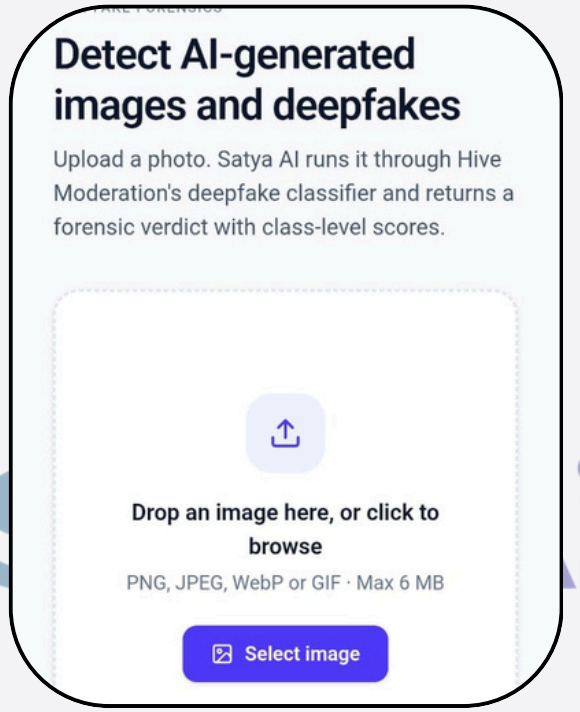
- **Unified Hub**: One platform to stop Fake News, Deepfakes, and Scam Apps.
- **Live Proof**: Instantly cross-references claims with verified journalistic sources.
- **Global Reach**: Real-time threat analysis across 100+ languages.
- **Instant Scan**: Simply drop a link for dynamic, millisecond analysis.

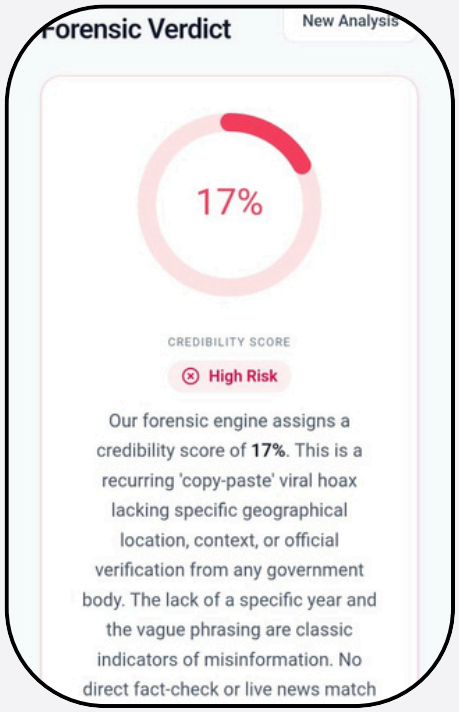
SatyaAi - Competitor Comparison

Feature / Capability	Your System	Logically.ai	Blackbird.AI
Real-time Detection	✓ Strong	⚠ Moderate	✓ Strong
AI Depth	✓ Strong	✓ Strong	✓ Strong
Behavioral / Emotional Analysis	✓ Strong	✗ Weak	⚠ Moderate
India-Specific Optimization	✓ Strong	⚠ Moderate	✗ Weak
Deepfake Detection	✓ Strong	⚠ Moderate	⚠ Moderate
Narrative / Campaign Detection	✓ Strong	⚠ Moderate	✓ Strong
Ease of Use / Cost	✓ Strong	✗ Weak	✗ Weak

Product Demo/ Features







A clean pop-up with a simple and easy login interface welcomes the user. Once logged in, the user is directed to a minimal and intuitive input screen where they can submit Text, URLs, or Images. With a single click, the scan process begins, delivering fast, real-time analysis. The results then appear on a clear dashboard, showing the verification status through semantic colors along with a choosen language explanation, making the outcome easy to understand for every user.

How It Works (Technical Overview)

LAYER 1 — INPUT & DATA

Text Input
Article / URL / Claim

Web Scraper
BeautifulSoup4

Text Preprocessor
NLTK / spaCy

LAYER 2 — AI/ML CORE

BERT Classifier
HuggingFace Transformers

Claim Extractor
spaCy + heuristics

Fact-Check Engine
Google Fact Check API

Source Credibility
MediaBias / Custom DB

Score Aggregator
Weighted fusion

SatyaAI

LAYER 3 — EXTERNAL APIS

Google Fact Check API
factchecktools.googleapis.com

NewsAPI
newsapi.org

HuggingFace Hub
huggingface.co/models

LAYER 4 — BACKEND & FRONTEND

FastAPI Backend
REST API server

Streamlit Frontend
Web UI

SQLite / JSON DB
Persistence layer

Implementation Highlights

Major Modules

- Fake News Text Detector
- AI Image Detector (Deepfake Scanner)
- Malicious App Scanner

APIs

- Google Fact Check Tools API
- NewsAPI
- Hive Moderation API
- VirusTotal API

SatyaAi

Core Technologies

- **Frontend (The Client)**: Built with React (specifically React 19) , Vite for blazing-fast performance , and Tailwind CSS for sleek, utility-class styling.
- **Backend (The Server)**: Powered by FastAPI (Python). It acts as the brain of the app, handling heavy AI calculations and data routing.

Real-World Impact

Who Benefits?

- **Everyday Citizens: Especially the elderly and less tech-savvy.**
- **Voters & Democracies: Protecting election integrity.**
- **Retail Investors: Shielding hard-earned money from market manipulation.**

Core Use Cases:

- **Elections: Debunking viral political deepfakes before they sway public opinion.**
- **Finance: Instantly verifying stock market rumors to prevent panic-selling.**
- **Daily Safety: Scanning forwarded WhatsApp links and deceptive utility apps before a user's phone gets compromised.**

SatyaAi

Future Scope / Scalability

Next-Gen Feature Expansion:

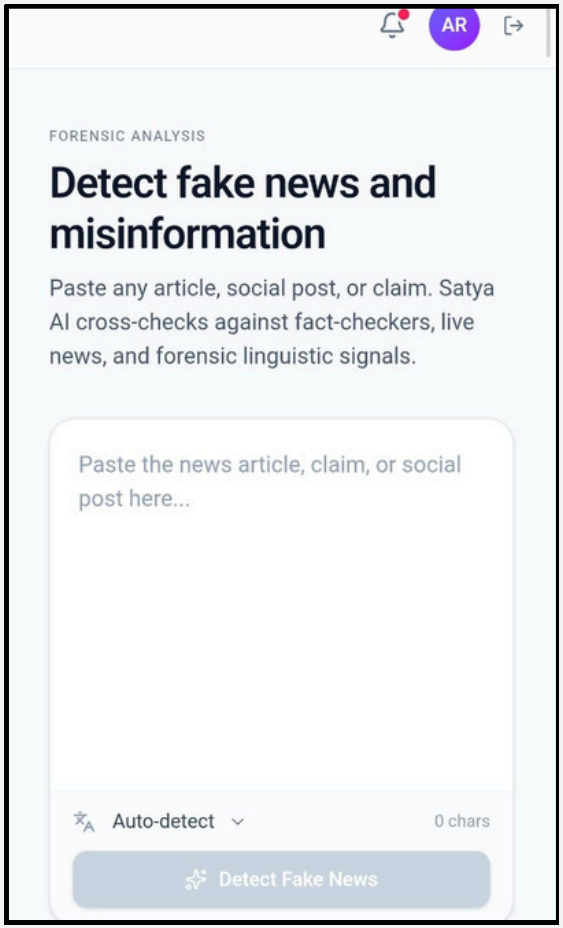
- **Multimodal OCR (Meme/Screenshot Scanning):** Extracting and cross-referencing **text found inside uploaded images**.
- **Deep Media Analysis:** Expanding our engine to **scan and verify manipulated videos and audio clones.**
- **The Transparency Engine:** One-click source auditing, giving users **direct access to the exact journalistic links used for our verification.**

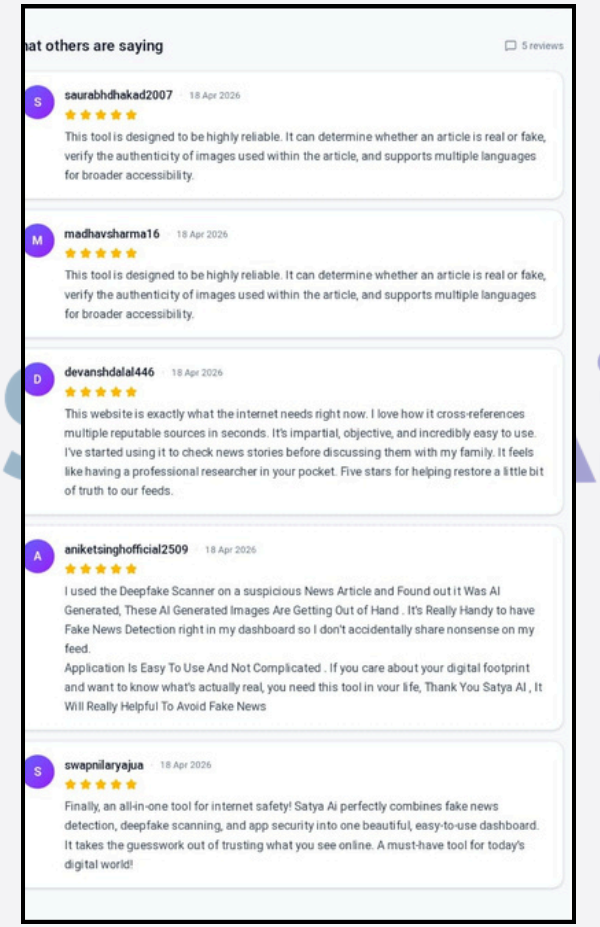
Infrastructure & Adoption Scaling:

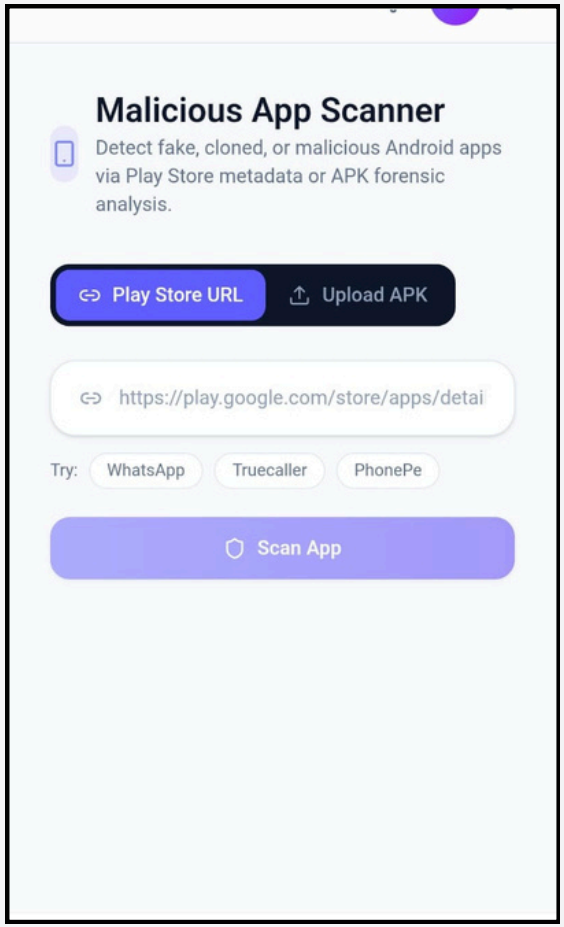
- **Enterprise AI Upgrades:** Transitioning to full-tier Hive API access for military-grade visual threat detection.
- **B2B Ecosystem & APIs:** Transforming Satya Ai into a "Platform as a Service" (PaaS) by licensing our API to social media companies and deploying premium WhatsApp bots.

User Experience

User Interface is designed to be clean, intuitive, and easy to understand, ensuring that anyone regardless of technical knowledge can quickly access and use the platform without confusion.







Drop (URL, Text, or Image) ➔ 2. Scan (Sub-second processing) ➔ 3. Understand (In multiple languages)

Demo / Live Walkthrough

Let us have a look of SatyaAi !!

Conclusion – SatyaAi

<<The Human & Economic Toll of Digital Disinformation>>

- **A Unified Shield**: One platform defending against the modern trifecta of Fake News, Deepfakes, and Scam Apps.
- **Accessible Truth**: Breaking the "black-box" AI barrier with Explainable AI in the user's native language.
- **Frictionless Security**: Real-time URL scraping and sub-second analysis built on a scalable, decoupled architecture.

SatyaAi

Our Ultimate Mission:

<<Moving everyday internet users from passive victims to having an active defense>>
